

Device Safety Data Sheet – Solid Reagents

1. Product and Company Identification

Product name: Respiratory Health Device – solid reagents	Product numbers: PS-300708
Company identification: Visby Medical, Inc. 3010 North 1st Street San Jose, CA 95134 Tel: +1-833-468-4729	Contact numbers: CHEMTREC (24-hour availability): +1 (800) 424-9300 (USA and Canada; Toll-Free)
Relevant identified uses of the substance or mixture and uses advised against: Bulk formulated pharmaceutical product/ mixture for use in diagnostic kit.	Note: This SDS is written to address potential worker health and safety issues associated with the handling of the formulated product/mixture. The toxicological and ecological properties of this mixture and/or its ingredients have not been fully characterized. This SDS will be revisited as more data become available.

2. Hazards Identification

Classification of the substance or mixture:	
Globally Harmonized System [GHS]:	Respiratory sensitizer – Category 1. Skin sensitizer – Category 1.
Other/Supplemental:	Mixture not yet fully tested
Label Elements	
GHS hazard pictogram:	
GHS signal word:	Warning
GHS hazard statements:	H317 – May cause allergic skin reaction. H334 – May cause allergy or asthma symptoms or breathing difficulties if inhaled.
GHS precautionary statements:	P261 – Avoid breathing dust. P272 – Contaminated work clothing should not be allowed out of the workplace. P280 – Wear protective gloves/eye protection/face protection. P285 – In case of inadequate ventilation wear respiratory protection. P302 + P352 – IF ON SKIN: Wash with plenty of soap and water. P304 + P341 – IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. P342 + P311 – If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician. P333 + P313 – If skin irritation or rash occurs: Get medical advice/attention. P363 – Wash contaminated clothing before reuse. P501 – Dispose of contents/container to location in accordance with local/ regional/national/international regulations.
Other hazards:	The potential health hazards associated with exposure/ handling of this mixture are unknown. The following data describe the hazards of individual ingredients, where applicable.

	<p>The mixture contains bovine serum albumin which has been associated with occupational sensitization. Material produced in compliance with USDA and/or CPMP/BWP/1230/98 (Guidance on Minimizing the Risk of Transmitting Animal Spongiform Encephalopathy Agents via Medicinal Products). This is a CPMP/ BWP/1230/98 Category IV material: it does not contain nor is it derived from specified risk materials as defined in Commission decision 97/534/EC (or successive amendments). Because the mixture contains a foreign protein, it may cause an allergic skin or respiratory reaction (e.g., potential to cause anaphylaxis). In a workplace setting, the likelihood of systemic effects following accidental ingestion is low, due to the rapid breakdown of proteins in the digestive tract. Although proteins are fairly large molecules, it is not known if systemic effects can occur following accidental inhalation. Proteins, in general, can cause skin and/or respiratory sensitization. Proclin 300 is an ingredient that contains a 3:1 mixture of 5-chloro-2-methyl-4- isothiazolin-3-one: 2-methyl-4isothiazolin-3-one and which is reported to be a skin sensitizer at levels as low as 0.0015%. This mixture also contains small amounts of trisma base and may be an eye irritant.</p>
--	---

Note:	<p>This mixture is classified as hazardous under GHS as implemented by Regulation EC No 1272/2008 (EU CLP), WHMIS 2015 (Health Canada), and Hazard Communication Standard No. 1910.1200 (US OSHA).</p>
--------------	--

3. Composition/Information on Ingredients

Hazardous Components:					
	Ingredient	CAS #	EINECS/ELINCS#	Amount	GHS Classification
	Bovine serum albumin	9048-46-8	N/A	0.5-1%	SS1: H317; RS1: H334
	3:1 Mixture: 5-chloro-2-methyl-4-isothiazolin-3-one: 2-methyl-4-isothiazolin-3-one	55965-84-9	613-167-00-5	≤0.008%	ATO3: H301; ATD3: H311; AT13: H331; SC1B: H314; SS1: H317; AA1: H400; CA1: H410

Note:	<p>The ingredient(s) listed above are considered hazardous. The remaining components are non-hazardous and/or present at amounts below reportable limits. See Section 16 for full text of GHS classifications.</p>
--------------	--

4. First Aid Measures

Immediate Medical Attention Needed:	Yes
Eye Contact:	<p>In the event of a chemical exposure, immediately irrigate eyes with copious quantities of water for at least 15 minutes. Remove contact lenses as soon as practical. Do not delay irrigation while waiting for contact lens removal. If irritation occurs or persists, notify medical personnel and supervisor.</p>

Skin Contact:	Wash exposed area with soap and water and remove contaminated clothing/shoes. If irritation occurs or persists, notify medical personnel and supervisor.
Inhalation:	Immediately move exposed subject to fresh air. If not breathing, give artificial respiration. If breathing is labored, administer oxygen. Immediately notify medical personnel and supervisor.
Ingestion:	If swallowed, call a physician immediately. Do not induce vomiting unless directed by medical personnel. Do not give anything to drink unless directed by medical personnel. Never give anything by mouth to an unconscious person. Notify medical personnel and supervisor.
Protection of first aid responders:	See Section 8 for Exposure Controls/Personal Protection recommendations.
Most important symptoms and effects, both acute and delayed:	See Sections 2 and 11
Indication of immediate medical attention and special treatment needed, if necessary:	Medical conditions aggravated by exposure: None known or reported. Treat symptomatically and supportively.
5. Firefighting Measures	
Extinguishing media:	Use water spray (fog), foam, dry powder, or carbon dioxide, as appropriate for surrounding fire and materials.
Specific hazards arising from the substance or mixture:	No information identified. May emit carbon monoxide, carbon dioxide, oxides of nitrogen, magnesium-containing compounds, sulfur-containing compounds, and chlorine-containing compounds.
Flammability/Explosivity:	No explosivity or flammability data identified. High airborne concentrations of finely divided organic particles can potentially explode if ignited.
Advice for firefighters:	In case of fire in the surroundings: use the appropriate extinguishing agent. Wear full protective clothing and an approved, positive pressure, self-contained breathing apparatus. Decontaminate all equipment after use.
6. Accidental Release Measures	
Personal precautions, protective equipment and emergency procedures:	If product is released or spilled, take proper precautions to minimize exposure by using appropriate personal protective equipment (see Section 8). Area should be adequately ventilated.
Environmental precautions:	Do not empty into drains. Avoid release to the environment.
Methods and material for containment and cleaning up:	DO NOT RAISE DUST. Surround spill or powder with absorbents and place a damp cloth or towel over the area to minimize entry of powder into the air. Add excess liquid to allow the material to enter into solution. Capture remaining liquid onto spill absorbents. Place spill materials into a leak-proof container for disposal in accordance with applicable waste disposal regulations (see section 13). Decontaminate the area twice with an appropriate solvent.
Reference to other sections:	See Sections 8 and 13 for more information.

7. Handling and Storage

Precautions for safe handling:	Follow recommendations for handling pharmaceutical agents (i.e., use of engineering controls and/or other personal protective equipment if needed). Avoid contact with eyes, skin and other mucous membranes. Wash thoroughly after handling. Avoid breathing dust.
Conditions for safe storage including any incompatibilities:	Store according to product labeling. Keep away from incompatible materials. Keep container/package tightly closed in a cool, well-ventilated place.
Specific end use(s):	No information identified.

8. Exposure Controls/Personal Protection

Note:	Wash hands, face, and other potentially exposed areas immediately in the event of physical contact.												
Control Parameters/Occupational Exposure Limit Values:	<table><tr><th>Compound</th><th>Issuer</th><th>Type</th><th>OEL</th></tr><tr><td>Bovine serum albumin</td><td>--</td><td>--</td><td>--</td></tr><tr><td>3:1 Mixture: 5-chloro- 2-methyl-4-isothiazolin-3-one: 2-methyl-4-isothiazolin-3-one</td><td>--</td><td>--</td><td>--</td></tr></table>	Compound	Issuer	Type	OEL	Bovine serum albumin	--	--	--	3:1 Mixture: 5-chloro- 2-methyl-4-isothiazolin-3-one: 2-methyl-4-isothiazolin-3-one	--	--	--
Compound	Issuer	Type	OEL										
Bovine serum albumin	--	--	--										
3:1 Mixture: 5-chloro- 2-methyl-4-isothiazolin-3-one: 2-methyl-4-isothiazolin-3-one	--	--	--										
Exposure/Engineering controls:	Selection and use of containment devices and personal protective equipment should be based on a risk assessment of exposure potential. Use local exhaust and/ or enclosure at dust-generating points. Use specifically designed and engineered local exhaust ventilation (LEV) and/or enclosure at dust-generating points and for high dust-generating operations. Limited open handling allowable for low dust-generating operations. Emphasis is placed on closed material transfer through direct connections, dust control and containment using LEV, certified downflow booths, glove bags, process containment via intermediate bulk containers (IBCs) with split butterfly valves (SBVs) and/or isolator technology.												
Respiratory protection:	Choice of respiratory protection should be appropriate to the task and the level of existing engineering controls. At a minimum, a tight-fitting full-face respirator with HEPA filters is required when performing dust or aerosol generating operations. A powered air-purifying respirator (PAPR) with HEPA filters and head cover is required for spill cleanup.												
Hand protection:	Wear nitrile or other impervious gloves if skin contact is possible. When the material is dissolved or suspended in an organic solvent, wear gloves that provide protection against the solvent.												
Skin protection:	Wear appropriate gloves, lab coat, or other protective overgarment if skin contact is likely. Base the choice of skin protection on the job activity, potential for skin contact and solvents and reagents in use.												
Eye/face protection:	Wear safety glasses with side shields, chemical splash goggles, or full-face shield, if necessary. Base the choice of protection on the job activity and potential for contact with eyes or face. An emergency eye wash station should be available.												

Environmental Exposure Controls:	Avoid release to the environment and operate within closed systems wherever practicable. Air and liquid emissions should be directed to appropriate pollution control devices. In case of spill, do not release to drains. Implement appropriate and effective emergency response procedures to prevent release or spread of contamination and to prevent inadvertent contact by personnel.
Other protective measures:	Wash hands in the event of contact with this product/ mixture, especially before eating, drinking or smoking. Protective equipment is not to be worn outside the work area (e.g., in common areas or out-of-doors). Decontaminate all protective equipment following use.

9. Physical and Chemical Properties

Appearance:	Solid (pellets)
Color:	White
Odor:	No information identified.
Odor threshold:	No information identified.
pH:	No information identified.
Melting point/freezing point:	No information identified.
Initial boiling point and boiling range:	Not applicable.
Flash point:	Not applicable.
Evaporation rate:	Not applicable.
Flammability (solid, gas):	No information identified.
Upper/lower flammability or explosive limits:	No information identified.
Vapor pressure:	Not applicable.
Vapor density:	Not applicable.
Relative density:	No information identified.
Water solubility:	No information identified.
Solvent solubility:	No information identified.
Partition coefficient (n-octanol/water):	No information identified.
Auto-ignition temperature:	No information identified.
Decomposition temperature:	No information identified.
Viscosity:	No information identified.

Explosive properties:	No information identified.																									
Oxidizing properties:	No information identified.																									
Molecular formula:	Not applicable (Mixture)																									
Molecular weight:	Not applicable (Mixture)																									
10. Stability and Reactivity																										
Reactivity:	No information identified.																									
Chemical stability:	No information identified.																									
Possibility of hazardous reactions:	Not expected to occur.																									
Conditions to avoid:	No information identified.																									
Incompatible materials:	No information identified.																									
Hazardous decomposition products:	No information identified.																									
11. Toxicological Information																										
Route of entry:	May be absorbed by inhalation, skin contact and ingestion.																									
Acute toxicity:	<table><tr><th>Compound</th><th>Type</th><th>Route</th><th>Species</th><th>Dose</th></tr><tr><td>Bovine serum albumin</td><td>--</td><td>--</td><td>--</td><td>--</td></tr><tr><td></td><td>LD50</td><td>Dermal</td><td>Rat</td><td>>141 mg/kg</td></tr><tr><td></td><td>LD50</td><td>Dermal</td><td>Rabbit</td><td>87.12 mg/ kg</td></tr><tr><td></td><td>LD50</td><td>Inhalation</td><td>Rat</td><td>0.171 mg/L/4h</td></tr></table>	Compound	Type	Route	Species	Dose	Bovine serum albumin	--	--	--	--		LD50	Dermal	Rat	>141 mg/kg		LD50	Dermal	Rabbit	87.12 mg/ kg		LD50	Inhalation	Rat	0.171 mg/L/4h
Compound	Type	Route	Species	Dose																						
Bovine serum albumin	--	--	--	--																						
	LD50	Dermal	Rat	>141 mg/kg																						
	LD50	Dermal	Rabbit	87.12 mg/ kg																						
	LD50	Inhalation	Rat	0.171 mg/L/4h																						
Irritation/Corrosion:	Proclin 300 contains an ingredient which was corrosive to rabbit skin at ≥0.75%.																									
Sensitization:	No studies identified. As bovine serum albumin (BSA) is derived from animal (foreign) protein, there is potential for the material to cause an allergic response in humans. Occupational exposure to BSA has caused some cases of allergic sensitization in workers handling this material. Proclin 300 contains an ingredient which was positive for skin sensitization at concentrations >0.0015%.																									
STOT-single exposure:	No studies identified.																									

STOT-repeated exposure/Repeat-dose toxicity:	No studies identified.
Reproductive toxicity	No studies identified.
Developmental toxicity	No studies identified.
Genotoxicity	No studies identified.
Carcinogenicity	No studies identified. None of the components of the mixture present at levels greater than or equal to 0.1% are listed by NTP, IARC, ACGIH or OSHA as a carcinogen.
Aspiration hazard	No data available.
Human health data	See "Section 2 - Other Hazards"
Additional information	The toxicological properties of this mixture have not been fully characterized.

12. Ecological Information

Toxicity:

Compound	Type	Species	Concentration
Bovine serum albumin	--	--	--
3:1 Mixture: 5-chloro-2-methyl-4-isothiazolin-3-one: 2-methyl-4-isothiazolin-3-one	EC50/120h (5-chloro-2-methyl-4-isothiazolin-3-one)	Anabaena flos-aquae	0.31 mg/L
	EC50/72h (5-chloro-2-methyl-4-isothiazolin-3-one)	Pseudokirchneriella subcapitata (alga)	0.11-0.16 mg/L
	EC50/96h (5-chloro-2-methyl-4-isothiazolin-3-one)	Pseudokirchneriella subcapitata (alga)	0.03-0.13 mg/L
	LC50/96h (5-chloro-2-methyl-4-isothiazolin-3-one)	Oncorhynchus mykiss	1.6 mg/L
	EC50/48h (5-chloro-2-methyl-4-isothiazolin-3-one)	Daphnia magna	4.71 mg/L

Persistence and Degradability:

No data available.

Bioaccumulative potential:

No data available.

Mobility in soil:

No data available.

Results of PBT and vPvB assessment:

No data available.

Other adverse effects:	No data available.
Note:	The environmental characteristics of this product/mixture have not been fully investigated. Releases to the environment should be avoided.
13. Disposal Considerations	
Waste treatment methods:	Used product should be disposed of according to local, state, and federal regulations. Do not send down the drain or flush down the toilet. All wastes containing the material should be properly labeled. Dispose of wastes in accordance to prescribed federal, state, and local guidelines, e.g., appropriately permitted chemical waste incinerator. Rinse waters resulting from spill cleanups should be discharged in an environmentally safe manner, e.g., appropriately permitted municipal or on-site wastewater treatment facility.
14. Transport Information	
Transport:	Based on the available data, this product/mixture is not regulated as a hazardous material/dangerous good under EU ADR/RID, US DOT, Canada TDG, IATA, or IMDG.
UN number:	None assigned.
UN proper shipping name:	None assigned.
Transport hazard classes and packing group:	None assigned.
Environmental hazards:	Based on the available data, this product/mixture is not regulated as an environmental hazard or a marine pollutant.
Special precautions for users:	Due to lack of data, avoid release to the environment.
Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code:	Not applicable.
15. Regulatory Information	
Safety, health, and environmental regulations/ legislation specific for the substance or mixture:	This SDS generally complies with the requirements listed under current guidelines in the US, EU and Canada. Consult your local or regional authorities for more information.
Chemical safety assessment:	Not conducted.
TSCA status:	Medical devices are exempt from TSCA.
SARA section 313:	Not listed.
California proposition 65:	Not listed.
Additional information:	No other information identified.

16. Other Information

Full text of H phrases and GHS classifications:	ATO3 - Acute Toxicity (Oral) Category 3. H301 - Toxic if swallowed. ATD3 - Acute Toxicity (Dermal) Category 3. H311 - Toxic in contact with skin. AT13 - Acute Toxicity (Inhalation) Category 3. H331 - Toxic if inhaled. SC1B - Skin corrosion Category 1. H314 - Causes severe skin burns and eye damage. SSI - Skin sensitizer Category 1. H317 - May cause an allergic skin reaction. RSI - Respiratory Sensitizer Category 1. H334 - May cause allergic or asthmatic symptoms or breathing difficulty if inhaled. AA1- Aquatic toxicity (acute) - Category 1. H400 - Very toxic to aquatic life. CA1 - Aquatic toxicity (chronic) - Category 1. H410 - Very toxic to aquatic life with long lasting effects.
