

Test a set of external controls with each new shipment received and once for each untrained operator. Further controls may be tested in order to conform with local, state and/or federal regulations, accrediting groups, or your lab's standard Quality Control procedures. An operator should confirm a valid test prior to interpreting results. A valid test is a green done light present as well as the presence of a results valid purple spot. For more information, please review Instructions for Use and Quick Reference Guide.

Note: If the positive or negative external controls fail, repeat with a new Visby Medical Respiratory Health Test. If the repeat test fails, please contact: Visby Medical Customer Support at 1-833-468-4729 (1-833-GoVisby).
